

SYN-ONE TEST™ PRIOR AUTHORIZATION FORM

Syn-One Test™ for Synucleinopathy

Syn-One is an anatomical pathology test to detect, visualize, and quantify the presence of abnormal, phosphorylated alpha-synuclein in cutaneous nerve fibers to support a diagnosis of a synucleinopathy: Parkinson's disease (PD), dementia with Lewy bodies (DLB), multiple system atrophy (MSA), pure autonomic failure (PAF), or REM sleep behavior disorder (RBD). Syn-One also includes intraepidermal nerve fiber density quantification to support a diagnosis of small fiber neuropathy, modified Congo red staining for quantification of amyloid protein to support a diagnosis of amyloidosis and skin morphology analysis via hematoxylin and eosin staining.

ATTACH ALL INFORMATION BELOW. PRE-AUTHORIZATION CANNOT BE PROCESSED IF NOT INCLUDED. SIGN AND FAX WITH THE DOCUMENTS LISTED TO (480) 569-2910.

- Patient's insurance card (front/back)
- Patient ID or face sheet
- Relevant medical records
